

Q2

```
db.createCollection ("Customer")
```

```
db.Customer.insert ({_id: 1, balance: 1800,  
                      type: "Savings" })
```

```
db.Customer.insert ({_id: 2, balance: 3000,  
                      type: "Current" })
```

```
db.Customer.find ({ balance: { $gt: 1200 },  
                  type: "Savings" })
```

```
db.Customer.aggregate ([  
  {  
    $group: {  
      _id: "$cust_id",  
      min_bal: { $min: "$balance" },  
      max_bal: { $max: "$balance" }  
    }  
  }  
]);
```

```
mongoexport -d Database -c Customer  
-f cust_id, balance, type --type=csv  
-o cust.csv
```

```
db.Customer.drop()
```

```
mongoimport -d Database -c Customer  
--type csv --file Customer.csv
```
